Presentation Summary

Speaker : Tony Chi

Topic : Wellness as Living Essentials

Summary : This discussion will delve into the dynamic interplay between 主動與被動動 (proactiveness and passiveness) as fundamental forces in the pursuit of wellness. By examining how self-awareness shapes our responses to both tangible environments and intangible emotional landscapes, we will explore the balance between actively shaping our surroundings and passively allowing moments of rest and reflection. Ultimately, this balance reveals that true wellness arises not solely from action or inaction but from the mindful integration of both, creating a harmonious flow between engagement and surrender in our daily lives.

Speaker : Hyouck Huh
